Profile

Software developer with 6+ years of iOS experience, transitioning into Java full-stack development. Completed Java Full Stack Development upskilling and built three end-to-end Spring Boot applications using Spring Security, Thymeleaf, JavaScript, REST APIs and MySQL. Brings strong experience in API integration, reusable components, debugging and quality-focused delivery.

Java Full Stack Projects

CineBook - Movie Ticket Booking Platform

Java 21 • Spring Boot • Spring Security • JPA/Hibernate • Thymeleaf • MySQL

- Built customer and admin workflows for movies, theatres, screens, show scheduling, seat selection and booking history.
- Implemented transactional seat holds with pessimistic locking to prevent double-booking; integrated Razorpay test checkout/signature verification, Cloudinary, email, Swagger/OpenAPI and automated tests.
